(54) DEVICE AND METHOD FOR STORING AND RETRIEVING PICTURE

(57)Abstract:

PURPOSE: To make a user able to unify recording conditions depending on the kind of an original by using a marksheet and specifying the recording conditions of preservation pictures.

CONSTITUTION: When input for starting original read is present, the original at the bottom among the originals placed on the original feeding device of a reader 1 is carried to an original platen and the pictures are read. Whether or not the read original is the marksheet and whether or not obtained information is valid are judged and the recording conditions are set based on the information. Then, the original to be preserved is read and preserved in an external storage device 6. In such a manner, since the marksheet 1 is used and the recording conditions of the preservation pictures are specified, the user unifies the recording conditions depending on the kind of the original. Since the recording conditions are also set by the marksheet, an operation at the time of reading a document is simplified.
